Outlook Web Access for Office 365

Outlook Web Access (OWA) provides the ability for you to check your email using a web browser. Instead of using Outlook on your computer, you simply browse to a web address and then login and check your email. The experience is very similar to other web email services, such as Gmail or Hotmail.

To access your email from a web browser on any internet connected computer, point the web browser to the following URL:

http://mail.office365.com

When prompted for your User ID, enter your complete email address. You will then notice a new Sign in at Wofford.edu link near bottom of the sign in screen.

Click the Sign in at Wofford.edu link. A new login prompt window will appear.

On the new login prompt window enter your complete email address and Wofford domain password. Click the OK button to login and display your email messages.
