Breaking COLORFUL GROUND on the Rosalind Sallenger Richardson Center for the Arts
It’s only fitting that Wofford’s groundbreaking for the Rosalind Sallenger Richardson Center for the Arts in early May was creative... and colorful.

From Wofford gold to Carolina Panthers blue to bright red and fuchsia, representatives from the Wofford Board of Trustees and the student and faculty delegation joined Jerry Richardson ’59, Rosalind S. Richardson, Ashley Richardson Allen and me to ceremoniously turn the brightly colored soil and commemorate the beginning of building construction. Such a joyful celebration is a testament to the philanthropic vision of Wofford alumnus and Carolina Panthers founder and owner Jerry Richardson. The Rosalind Sallenger Richardson Center for the Arts will house Wofford’s studio art, art history and theatre programs, essential to the college’s strong liberal arts tradition. We will continue to keep you up to date on our progress as we look forward to the grand opening in spring 2017.

Also in May prior to receiving their diplomas, 368 Wofford students enjoyed an inspirational Commencement address from NBC Today Show national correspondent Craig Melvin ’01 as he urged our soon-to-be graduates to “find your thing and do it, and figure out how to keep it going.” Our graduates have been equipped with the knowledge, education and tools to transform the world, and our future will be better for it.

As the following pages will demonstrate, we look toward the future of our college with great anticipation as we begin to fulfill our strategic vision with amazing new facilities, new opportunities for learning and engagement, and exciting ways to work with and enhance our local community. I am glad you are a partner with us on this amazing journey.

Go, Terriers!

Nayef

From the PRESIDENT
IT’S YOUR WORLD: SERVE IT.

Some of the Carolina Miracle League’s biggest fans aren’t fans—they’re Wofford student-athletes, and each year they volunteer as buddies to ensure the safety and fun of the athletes with special needs.

A. WISEMAN RETIRES AS DEAN OF INTERNATIONAL PROGRAMS

Dr. Ana Maria Wiseman, dean of international programs, retired from the college at the end of the 2014-15 academic year. In addition to promoting cross-cultural study, travel and understanding at Wofford, she helped create international study centers in Barcelona, Amsterdam and Granada. For this work, IES recognized her with a Lifetime Achievement Award in 2012.

B. JAMES AND MELVIN ELECTED TO WOFFORD COLLEGE BOARD OF TRUSTEES

In June the Annual Conference of the United Methodist Church of South Carolina elected R. Michael James ’73 and Craig Melvin ’10 to four-year terms on the college’s Board of Trustees. They replace C. Michael Belcher, Jr. ’72, whose terms expired.

James retired in 2007 as the founding partner of WEDGE Capital Management in Charlotte, N.C. Melvin is a national correspondent for NBC’s Today Show.

D. KAPPA ALPHA ORDER BROTHERS COACH LOCAL LITTLE LEAGUE TEAM

Henry Comelson ’18, Owen Hughes ’18 and Carson Walls ’18 spent the spring semester coaching a Little League team of 10-year-olds. They practiced and played most of their games at local Hillbrook Park. Trent Wells ’18 was named a manager. The team finished the season 6-7 and has loved the Wofford student support. The young coaches admit that they learned a lot from the experience, had fun and worked to set a good example for their players. Read their story at wofford.edu/woffordtoday »

E. MOELLER NAMED SCIUC PROFESSOR OF THE YEAR

South Carolina Independent Colleges and Universities (SCICU) recognized Dr. John Moeller, associate professor of history, with its 2015 Moeller’s award.

Alumni updates, Terrier features, in memoriam
At Wofford College it is usually all about the Terriers, but on March 26 it was all about a hawk. Ken Pettit, Wofford’s preventative maintenance supervisor, found the injured hawk last fall. After six months of rehabilitation at the Carolina Raptor Center in Huntersville, N.C., the red-tailed hawk was returned to campus to be released.

TRAVIS TROJAN ACCEPTS FULBRIGHT TO TAIWAN
by Jo Ann Mitchell Brasington ’89

When Travis Trojan ’15 played The Game of Life as a child, he bypassed college and went straight to a career. He was planning to follow that same path in “real life” after graduating from high school, but his parents had other plans.

Now he’s glad they did. Trojan, a first-generation college student from Spartanburg, S.C., was just awarded a Fulbright Teaching Assistantship to Taiwan. According to Trojan, it’s one step closer to his goal of becoming a college professor.

“It’s crazy. I knew very little about college growing up, now I’d love nothing better than to spend the rest of my life on a college campus teaching students and sharing my passion for languages,” says Trojan. “I’m really glad now that my parents insisted that I go. I’ve met people from all over the country and the globe. The students, faculty and staff at Wofford have made this the best four years of my life.”

Trojan begins his English teaching assignment in Taiwan in September following a month of orientation and training. He’s excited about living abroad for 11 months and giving his students opportunities to make language personal.

“I’ve learned from two semesters abroad in Beijing (China) and a semester in Freiburg (Germany), as well as from my experiences with international students at Wofford, that people in other countries really focus on the technical aspects of language,” he says. “I want to introduce my students to language as a way to tell their stories.”

Trojan majored in both Chinese and German with a concentration in gender studies. He has been accepted into Carnegie Mellon University’s prestigious Second Language Acquisition M.A. program, but is deferring that offer while he completes his Fulbright assignment. He believes after the Fulbright, he’ll be a good candidate for Carnegie Mellon’s Ph.D. program.

Trojan says Wofford provided lots of support and help with his Fulbright application. He specifically credits Dr. Kirsten Krick-Aigner, professor and chair of the Department of Modern Languages, Literatures and Cultures who leads the Fulbright application program at Wofford; Dr. Beate Brunow, assistant professor of German; Dr. Li Qing Kinnison, associate professor of Chinese Studies; and Dr. Yongfang Zhang, assistant professor of Chinese.

Trojan was the Palmetto Chinese Star winner for South Carolina, dominating both language proficiency and cultural proficiency in the advanced level, winning first place in both. He represented the state at the regional Chinese Bridge competition in Washington, D.C., in April. Trojan’s painting received the highest score in cultural performance, and he won fourth place overall in the competition that included proficiency in speech, cultural performance and knowledge.

“Travis absolutely embodies the Fulbright mission of aspiring to world peace through intercultural engagement,” says Krick-Aigner. “I am so proud of what he has accomplished at Wofford and abroad and look forward to hearing about his future successes!”

WOFFORD STUDENTS SELECTED FOR PRESTIGIOUS NATIONAL AND INTERNATIONAL SCHOLARSHIPS

MAKING the MOST of the gift of EDUCATION
DONOVAN HICKS NAMED A 
HARRY S. TRUMAN SCHOLAR
by Sarah Madden '17

Wofford’s Truman Scholar, Donovan Hicks ’16, talks a lot about making the most of the gift of education. A first-generation college student, Hicks came to Wofford because of a generous financial aid package and because he felt at home. The financial gifts and the gift of a Wofford welcome, however, were just the beginning.

“The Wofford liberal arts educational experience makes you stand out,” says Hicks, who this spring was awarded a Harry S. Truman Scholarship that will provide him with $30,000 toward graduate school and the opportunity to participate in professional development programming that will prepare him for a career in public service leadership. “My dreams are very large. I want to go to a top-10 law school. I want to work in education policy. I would love to ultimately be the CEO of, say, the Ford Foundation, the Roosevelt Institute or some big educational institution like that. One day I will, thanks to my start at Wofford College.”

Hicks, a government and finance major from Boiling Springs, S.C., is taking yet another step toward that goal this summer. He was one of 10 people selected as a 2015 Public Policy and International Affairs Law Fellow at the University of California, Berkeley. The program provides students with training and financial support for graduate school and facilitates ongoing professional development.

Hicks is quick to say that he would not be where he is without mentors on the Wofford faculty and staff. He calls Dean of Students Roberta Bigger ’81 one of his “biggest confidants” and says that Dr. Philip Swicegood, the R. Michael James Professor and Coordinator of the Finance Program, will have his eternal respect.

“My dreams are very large. I want to go to a top-10 law school. I want to work in education policy. I would love to ultimately be the CEO of, say, the Ford Foundation, the Roosevelt Institute or some big educational institution like that. One day I will, thanks to my start at Wofford College.”

As a Bonner Scholar at Wofford, Hicks provides 180 service hours per semester to South Carolina Legal Services. He also has served as vice president of the Wofford Campus Union student government organization and is director of Student to Student (S2S), a local service initiative at Boiling Springs High School that aims at positioning students so that college is an option for them. In addition, Hicks works with Reformed University Fellowship (RUF), a Christian outreach ministry on campus. He has completed two summers of service, one in New York City mentoring inner-city children with Project Morray and another in India doing communications for South Carolina Legal Services. He also shares his love of Wofford with prospective students as a Wofford Ambassador.

“Education is an issue I get fired up about, mostly because I realize the impact that education has had on me. That’s why I’ve tried to make the most of it—why I’ve tried to be so involved,” explains Hicks. “I feel the need to give back. If I don’t stand out, then I feel like I’m being unappreciative of the help I’ve been given.”
WORTHY RECEIVES CRITICAL LANGUAGE SCHOLARSHIP TO STUDY IN BEIJING THIS SUMMER
by Kelsey Aylor ’17
Simone Worthy ’15, a Chinese major with minors in economics and government from Stockbridge, Ga., has been awarded the Critical Language Scholarship from the U.S. Department of State. The highly competitive national scholarship will fund Worthy’s participation in an intensive, eight-week Chinese language living and learning experience, including a home stay, in Beijing, China. She left the U.S. on June 19.

“It’s that attitude and a tireless work ethic, says Dr. Yongfang Zhang, assistant professor of Chinese, that helped make Worthy an excellent candidate for the CLS. “Chinese can open so many doors, but students must be at a high level of proficiency to take advantage of that. With her extensive study and commitment to excellence, Siman has put herself in a position to succeed,” says Zhang.

Worthy spent a semester abroad in China and a summer in the Middlebury Chinese Language School. She also helped with Wofford’s STARTALK summer Chinese language program for pre-college students. In addition, she has studied Spanish for five years.

Worthy is the second student in the college’s Chinese program to receive this scholarship. WestLee Parker ’16, won the scholarship and spent eight weeks in China during the summer of 2014.

NICHOLSON NAMED WOFFORD’S PRESIDENTIAL INTERNATIONAL SCHOLAR FOR 2015-16
by Laura Hendrix Corbin
Phifer Nicholson ’16 has spent much of his three years at Wofford College studying interfaith engagement and the power it can have in creating peace between differing faith communities. Now he will get a chance to experience that first-hand as the 2015-16 Presidential International Scholar, traveling to Turkey and living with an Arabic-speaking minority Christian community in a majority Muslim country.

“I have a passion for seeking and creating peace as a committed Christian in the midst of this diverse, rapidly globalizing world,” says Nicholson, who is majoring in religion and minoring in business.

Nicholson was named the 32nd Presidential International Scholar by Wofford President Nayef Samhat. The innovative program allows one student to travel internationally to research an independent project. The scholar is selected based on exceptional potential to benefit humankind and a demonstrated passion for service learning, combined with a globally minded intellectual curiosity.

LAMM TO SPEND JUNIOR YEAR ABROAD AS BOREN SCHOLAR
by Jo Ann Mitchel Brasington ’89
Helen Lamm ’17 already has a job lined up after she graduates from Wofford College in May 2017. Recently selected as the recipient of a prestigious Boren Scholarship to China, Lamm will spend a year abroad honing her language skills and another year at Wofford completing her degree before joining the federal government in the area of national security.

“I’m getting to study the language and culture that I love, and I have a job lined up after college. I’m so grateful for this opportunity and for those who helped me along the way,” says Lamm, a Chinese language major with minors in history and studio art from Florence, S.C.

While in China, Lamm will be studying environmental protection through the C.V. Starr Middlebury School in Kunming for the first semester. During Interim she will take the intensive language course in Beijing. Although plans for the second semester are still tentative, Lamm is planning to continue her environmental research or to complete an internship in either Kunming or Hangzhou.

“Helen has such a wide range of interests and knowledge—she dances well, paints well, draws well, speaks well and asks tough questions—and she brings all of that with her to class,” says Dr. Li Qing Kinnison, chair of the Chinese Studies program. “She, like Wofford Rhodes Scholar Rachel Woodlee ’13, wants to use her knowledge to build a bridge between China and the United States.”

THE FUTURE’S SO BRIGHT

Class of 2015 shares postgraduate plans

Within six months of graduation, Wofford expects more than 94 percent of the Class of 2015 to be employed or in graduate school. That’s been the trend for years, and this class is definitely equipped to carry on the tradition. Here’s a sampling of what the future looks like for these newly minted graduates.

by Jo Ann Mitchell Brasington ’89

FUTURE BOMB DISPOSAL OFFICER IN THE ARMY ORDINANCE CORPS

John Prevost
Hometown: Shelby, N.C.
Major: psychology
Prevost proposed to his wife, Erin McGaha Prevost ’15, a Wofford cheerleader planning to teach special education in the fall, during halftime of a Wofford home football game. The battalion commander and ranger challenge team leader for Wofford ROTC, Prevost was the number one cadet out of a group of 460 from all over the country last summer during basic training.
FUTURE EDUCATOR
Mary Kathryn Macklen
Hometown: Irmo, S.C.
Major: English with a concentration in African/African-American Studies and certification through the Teacher Education program

Macklen was awarded the Columbia University Teachers College Scholarship and will begin a master of education degree in social analysis at Columbia’s Teachers College in the fall. She plans to focus on the issues of urban education and social justice. Captain of the women’s soccer team, she was named to the SoCon All-Academic team all four years at Wofford. She served on the Student Athlete Advisory Committee and worked as a peer tutor in the Writing Center.

FUTURE ACCOUNTANT
Shonie Campbell
Hometown: Paget, Bermuda
Major: accounting with a minor in business economics

A goalkeeper on the women’s soccer team, Campbell won the accounting departmental award during senior honors convocation. She was named to the Southern Conference Academic Honor Roll all four years. Campbell will work with PwC in Bermuda while getting her master’s degree in accounting.

FUTURE MINISTER
Palmer Cantler
Hometown: Johnson City, Tenn.
Major: religion with a minor in accounting

Cantler begins Duke University Divinity School in the fall with plans to pursue ordination as an elder in the United Methodist Church. She has a full scholarship with paid internships at Wofford. She was involved in the college’s musical groups and was named Flahsbrooke Woman of the Year in 2015. She served on the Church-College Council and with the college’s athletics marketing office. She also worked as the youth coordinator at Central United Methodist Church in Spartanburg. In 2015 she travelled during the summer to Israel to participate in an archaeological dig with Albert C. Outler Professor of Religion Dr. Byron McGane.

FUTURE STORM CHASER
Justin Whitaker
Majors: mathematics and physics with a minor in computer science and an emphasis in computational science

Whitaker will study hurricane development while pursuing a Ph.D. in atmospheric science at Colorado State University. He ran cross country and indoor and outdoor track and field at Wofford and was one of three honor graduates with a perfect 4.0 GPA. He was on the Student Athlete Advisory Committee and founded the McCarthy Teszler Committee, which pairs student-athletes with children and adults with special needs for mentoring and service. He was the recipient of the John Wesley Scholarship, Dave Hart Southern Conference postgraduate scholarship and the 2014 Meteorological Society’s Guillermo Salazar Rodriguez Undergraduate Scholarship. He received honorable mention recognition from both the Barry Goldwater Foundation scholarship program and the National Science Foundation’s graduate fellowship program.

FUTURE DENTIST
Haiwen Zhang
Hometown: Beijing, China
Major: biology

Only 19 years old, Zhang is a Phi Beta Kappa graduate who will attend dental school at the Medical University of South Carolina (MUSC) in Charleston in the fall. He graduated in three years and completed an internship at MUSC last summer. He volunteered during the academic year at Spartanburg Regional Medical Center and was a Helmus Creative Writing Contest short story winner.

FUTURE ADDICTION RESEARCHER
Jake Wright
Hometown: Anderson, S.C.
Major: biology with a concentration in neuroscience

Wright will attend the Ph.D. program in neuroscience this fall at the University of Pittsburgh (full tuition paid with a stipend). He played on the Wofford men’s soccer team for three years, completed a summer research experience at the University of Kentucky and exhibited his pottery in the Roger Milliken Science Center this spring.
FUTURE PHYSICIAN

Mariya Mohammed
Hometown: Spartanburg, S.C.
Majors: biology and Spanish
A scholarship recipient planning to attend medical school at Wake Forest University, Mohammed completed three summer internships exploring various facets of health care, including an experience in computational science at Oakridge National Laboratories. She studied the health care industry in Santiago, Chile, during Interim and also spent a semester abroad in Granada, Spain. Mohammed has held leadership positions in Alpha Phi Omega service fraternity and in Beta Beta Beta biological honor society.

FUTURE ARTIST, CURATOR AND TEACHER

Mills Brown
Hometown: Florence, S.C.
Majors: art history and English with a concentration in studio art
Brown has been awarded a scholarship at American University in Washington, D.C., where she will pursue an MFA in studio art. As a Wofford student, Brown curated The Johnson Collection, started a graphic design business and published a children’s book, “The Artist’s Alphabet.” She undertook significant research on a body of important Southern landscapes and presented that research at the National Conference of Undergraduate Research.

FUTURE ATTORNEY

Joe Brook
Hometown: Columbia, S.C.
Majors: government and history
Brook will enter the University of North Carolina School of Law in the fall, where he plans to apply to write for the university’s law review. Brook won several South Carolina Press Association awards for his work as a senior writer on the Wofford Old Gold and Black student newspaper staff. He was vice president of Pi Kappa Alpha fraternity, a member of the Hardin Pre-Law Society, a runner for Harrison, Smith, White and Coggins attorneys at law, and an avid and very vocal Terrier fan.

FUTURE PROFESSOR

Chad Sauvola
Hometown: Greer, S.C.
Majors: art history and biology
Sauvola will attend MIT in the fall, where he will study molecular biology (full tuition with stipend). He has completed research internships at MIT, the University of North Carolina and the University of Copenhagen in Denmark. Sauvola was one of the college’s honor graduates with a perfect 4.0 GPA and was named the 2014 SCICU J. Lacy McLean Student of the Year.

FUTURE CEO

Victoria DaSilva
Hometown: East Greenwich, R.I.
Majors: finance and mathematics with a concentration in applied math and a minor in studio art
After a trip to Portugal, Spain and Morocco, DaSilva will begin a job as a financial analyst with Wells Fargo Investment Bank in Charlotte, N.C. An accomplished painter and pianist who also competes nationally in sailing, DaSilva served as managing partner of the R. Michael James Student Managed Investment Fund. She was on the college’s winning CFA Institute Research Challenge team, the Math Research Group, the women’s tennis team, the Campus Union Financial Affairs Committee and the Chamber Music Trio.
A graduate of the Class of 2015 weighs in on the Rosalind Sallenger Richardson Center for the Arts

by Mills Brown '15
A of both worlds from the moment or not, Wofford will offer the best in graduate school.

...well as a studio-based experience worlds: a liberal arts education as of experiencing the best of both helped shape it, I have the privilege because of my undergraduate University in Washington, D.C.

This year, a senior...eral arts education.

...became a believer studio art). I quickly over a college of...have the chance to thrive in a new department of kinesthetic learning. Even students of economics and math, with their passion for detailed analysis, might find inspiration through the arts to visualize their sciences in new, original ways.

The new building’s physical location on campus also speaks to its broad impact. Tucked diagonally across the lawn from Main Building night outside the Roger Milliken Richardson Center for the Arts will seemingly connect every realm of learning and foster the growing diversity of our student body. Most importantly, the Rosalind Sallenger Richardson Center for the Arts will continue to encourage the interdisciplinary sharing of ideas across campus, which I have discovered to be the most significant, exciting and rewarding aspect of the liberal arts experience at Wofford.

While I’d love to experience the wonders of the new building for myself, I’ll be content to return as a proud graduate and see how the new center further transforms our campus community. Who knows, maybe I’ll be back here one day teaching or coaching my works. The possibilities are limitless, thanks to the power of the gift.

...they first visit our campus. Since its founding in 1854, Wofford has excelled in the classic areas of learning. As the college continues to grow, the Rosalind Sallenger Richardson Center for the Arts will enhance and deepen these same intellectual values. Art history students even take part in performing plays themselves as if they were part of an ancient symposium. Students of biology, so accustomed to the hands-on experience in a lab, will have the chance to thrive in a new department of kinesthetic learning. Even students of economics and math, with their passion for detailed analysis, might find inspiration through the arts to visualize their sciences in new, original ways.

The new building’s physical location on campus also speaks to its broad impact. Tucked diagonally across the lawn from Main Building, the Roger Milliken Richardson Center for the Arts will seemingly connect every realm of learning and foster the growing diversity of our student body. Most importantly, the Rosalind Sallenger Richardson Center for the Arts will continue to encourage the interdisciplinary sharing of ideas across campus, which I have discovered to be the most significant, exciting and rewarding aspect of the liberal arts experience at Wofford.

While I’d love to experience the wonders of the new building for myself, I’ll be content to return as a proud graduate and see how the new center further transforms our campus community. Who knows, maybe I’ll be back here one day teaching or coaching my works. The possibilities are limitless, thanks to the power of the gift.
Congratulations
CLASS OF 2015

Speaker: Craig Melvin ’01, NBC Today Show correspondent

Honorary Degrees:
Hugh C. Lane Jr., South Carolina banker and philanthropist
Henry C. Giles Jr. ’68, longtime educator and the president of Spartanburg Community College

Teaching Awards:
Dr. John Moeller, associate professor of biology—Roger Milliken Award for Excellence in the Teaching of Science
Dr. Laura H. Barbas Rhoden, professor of Spanish—Philip Covington Award for Excellence in the Teaching of Humanities and Social Sciences

Algernon Sydney Sullivan Awards:
Scott Jackson Neely ’00, pastoral executive at First Presbyterian Church in Spartanburg
Jon Nicholas Gault, a chemistry major with a minor in government from Union, S.C.

Mary Mildred Sullivan Awards:
Dr. Colleen Perry Keith, past president of Spartanburg Methodist College, new president of Pfeiffer University
Catherine Elizabeth Miller, an English and philosophy major from Zirconia, N.C.

Honor Graduates (4.0 GPAs):
Chad William Sauvola, an art history and biology major from Greer, S.C.
Justin William Whitaker, a physics and mathematics major with a minor in computer science and an emphasis in computational science from Free Home, Ga.
Alissa Marie Williams, a biology and computer science major with a minor in mathematics and an emphasis in computational science from Kentwood, Mich.

GETTING IT RIGHT

94 Wofford women from the Class of 2015 enter science, technology, engineering and math fields

by Sarah Madden ’17

The United States Census Bureau reported that only 26 percent of employees in STEM (science, technology, engineering and math) fields were women (2013 data). At Wofford College, the distribution is different: women make up about 53 percent of students in STEM fields.

In May, 94 women graduated from Wofford with majors in mathematics, computer science, biology, psychology, environmental studies, physics or chemistry. Many are headed to medical schools or Ph.D. programs to continue preparation for careers as professors, researchers, doctors, teachers and therapists. Many, like Samantha Hemleben ’15, recognize that they are entering a world in which women are the minority and that there are specific challenges to being a woman in a STEM field.

“I always liked math, but some teachers in high school told me, ‘You’re not really good at it. You might not be able to go into a field, the better we are,” she says. “It makes me sad when women feel intimidated, that it’s ‘not for them,’ or feel unwelcome. The more women we have going into a field, the better we are.”

Rakiya Faulkner ’15, a chemistry major from Lancaster, S.C., says at Wofford being a woman in a STEM field is not unusual.

“There are so many STEM women here that I haven’t really felt the pressure that others talk about,” she says. “I started out in biology but loved chemistry more and was led to change majors in a business class.”

While taking “Business Leadership and Beyond” with professor emeritus Dr. Jim Proctor, Faulkner says she told Proctor about her love of chemistry. He encouraged her to follow her passion. Now Faulkner is eager to begin medical school in the fall at the Medical University of South Carolina in Charleston.

Another chemistry major, Emily Sacher ’15, is beginning a five-year, research-based Ph.D. program in organic chemistry at Notre Dame. She was influenced by her “awesome high school teachers” to study chemistry and believes that women should not sell themselves short. She says she has felt supported at Wofford, and Annika Jansson ’15, a psychology major from Folsom, Calif., and Alissa Williams ’15, a biology and computer science major from Kentwood, Mich., both agree.

Jansson, a scholar-athlete on the college’s women’s soccer team who says the faculty of the Psychology Department have been exceptional in their encouragement, is bound for the Medical University of South Carolina with plans for a career in occupational therapy. Williams, a Goldwater Scholar who recently was named to the CoSIDA Academic All-District Track & Field/Cross Country team, has a full scholarship with stipend to attend the University of California, Berkeley. She will pursue a Ph.D. in computational biology.

“I came here knowing of Wofford’s strong biology program, and a professor recommended that I take the computer science emphasis… Now that I’ve done some internships [at Harvard Medical School, Cold Springs Harbor and the European Bioinformatics Institute in Cambridge, England], I’ve realized how important computer science is to biology. It’s cool to be able to apply your programming skills to solving biological problems,” says Williams.

According to Williams, Wofford does a good job of exposing women to different opportunities in the STEM fields, but she still would like to see even more women take advantage of the opportunities.

“It hasn’t been hard at Wofford to be a woman in a STEM field just because there is so much support,” says Carol Sadek ’15, a mathematics and computer science double major from Mount Pleasant, S.C., “but in the real world, when you go to conferences—or grad school visits, like I’ve just done—the population is heavily male. You have to deal with the fact that you are one of a few women in a male-dominated field. I think that the professors here, especially with the significant presence of female professors, make it easier for women to be in STEM fields.”

Sadek, who did summer research experiences with Oak Ridge National Laboratories and with the NSA, will begin a Ph.D. program in applied mathematics at the University of North Carolina, Chapel Hill. She received honorable mention for the COMAP mathematical modeling competition and was a finalist for the CSCSE-SE regional computer science competition.

During the past semester 15 women taught in the science, technology, engineering and mathematics areas at the college. All hold doctoral degrees and three serve as department chairs.

“In 2011, the last time they produced the ranking, Forbes.com listed Wofford 14th among the nation’s best colleges and universities for women in STEM fields. These are schools that are getting it right,” wrote Forbes. “Wofford is still getting it right,” says Provost Dennis Wise msam. “Our women are at the forefront of science, and we are eager to see all that they will accomplish.”
Holding Their Own

An update from some of the women who were on campus when Wofford first admitted women as resident students

By Jo Ann Mitchell Brasington '89
WHERE ARE THEY NOW?

Whether holding their own in class or competing for playing time in Andrews Field House, Wofford’s first resident women students more than proved their place on campus. For a short period of time, their presence alone was a useful tool in law school and in my career.”

Wofford College at center around the many sports events that I attended as a cheerleader. We spent many hours together practicing, traveling to games and representing Wofford at college events. Several years ago she helped organize a Facebook group of those first cheerleaders as well as teammates and roommates. They take a summer trip every two years and gather for Homecoming. “We remember special memories from our years at Wofford and make new memories together.”

Margaret Vevon Edgerton ’80 and her husband opened a nursery/garden center in Rutherfordton, N.C., right after graduation. They also started the Rutherford Towne Builders/Developers. Edgerton went on to earn her real estate license and become a registered nurse. She currently works for Rutherford Regional Health System and sells real estate for Coldwell Banker Quarters in Lake Lure. She raised four successful children and loves to sail and coach recreational league soccer. “One of my Wofford College memories was dropping water balloons off the fifth floor of Wightman Hall when the other students were having tea in the cafe. We never hit anyone, just splashed their feet. Another memory was going camping in the Keys for Interim and having a 75-mile-per-hour storm blow away our entire tent village. There was only one hotel room left in the entire area, so all 25 of us stayed in one room that night.”

Lynn Smith Fox ’77 retired a few years ago after a long career with the Federal Reserve and now enjoys service on nonprofit boards. She is also the wife of a college president (St. Lawrence University in Canton, N.Y.) and helps teach a course focused on the Fed. Fox attended Wofford for a few years but transferred to Smith College and graduated from there. She went to work on Capitol Hill right after graduation. “My daughter was raised in D.C. and remembers the frantic years when I was Chairman Greenspan’s chief spokesperson and ran the public affairs program. When my husband became college president I took on a different role, working on a range of projects related to Sept. 11 and, later, the global financial crisis.” Fox says being one of the first women on campus during the time was hard, interesting and wonderful. She competed for the first

Beth Dashell Wallace ’82, Shelley Henry Sperska ’75, Roberta Hurley Bigger ’81 and Dr. Carol Braigson Wilson ’81 (pictured on previous page, left to right) are all members of the faculty or staff at Wofford. They all recall being Wofford students in the beginning days of full, residential co-education and serve as role models and mentors for current Wofford women. A registered nurse, Wallace is the associate vice president for student affairs and the director of the Wellness Center. Sperska is the director of technical services in the Sandor Tesler Library. (Her sister Kim Henry ’86 is also on campus as the Macintosh support specialist and multimedia instructor for the Department of Modern Languages, Literatures and Cultures.) Bigger serves the college as dean of students, and Wilson serves as the coordinator of academic advising and professor of English.

Since 2000, Sally Nan Barber ’78 has worked with the executive vice president for health affairs and the director of government relations. Before that she practiced law in Charlotte, N.C., for 18 years with Parker Poe. She lives in Charlotteville, Va., and loves her job, especially her colleagues and the interesting and complex issues she handles every day. After being a day student for two years, Barber was a junior when the first women were admitted as residential students. “I recall there were around 40 of us female residents on the top floor of Wightman Hall. A soprano had transferred from another school (Duke), and she commented on how few W of Virginia Health System as the special adviser to the executive vice president for health affairs and the director of government relations. He had amazing posture and a zip in his stride, like he was full of pizzazz and energy … I came to his memorial service … sat in the back and wept through the entire service. Dr. JoAnn Deakin Carpenter ’77 then (in her senior yearbook photo) and now (as a professor of history at Florida State College).
Anna Todd Wofford scholarships and was so impressed with Anna’s triple name that she adopted “Lynn Smith Fox” professionally. “I loved the Wofford faculty and President. Joe Lesesne (he got dorms for women)... I became intellectually ambitious as a result of being around smart students and teachers. I spent interim in London... even took my first plane flight to get there... It was an incredible, formative experience and partly the cause of my lifelong commitment to liberal arts colleges. There’s no better education, and Wofford gets it right.”

Dr. Debora Johnson-Ross ‘81 is an associate professor of political science and international studies at McDaniel College. She’s currently on leave from McDaniel and working as the senior vice president of academic innovation for BridgeEdU in Baltimore, Md. Johnson-Ross conducted her doctorate research in Cameroon and was a Fulbright Fellow to Cameroon during 2006-07. She’s taken groups of students there as well as to Zimbabwe and also has traveled, lectured and studied in other places in Africa. Johnson-Ross was in the second group of women residents at Wofford and was often the only black student in a class. “To be quite honest, I was very bitter about many of my experiences at Wofford... in retrospect, I gained a great deal from Wofford I have treasured friendships and a network of alumni that can be accessed successfully (which I did even when I lived in Sierra Vista, Ariz., and spotted a Wofford bumper sticker). I also learned many of the strategies and tools that remain useful today, like mediation, listening to others’ perspectives and accepting the challenge of educating others about cultures and worldviews different from their own. I gained a world-class education at Wofford, and for that, I am grateful.”

Living in Timonium, Md., Pam Mason ’77 directs the Medical Education Grants Office at AstraZeneca in Wilmington, Del. Her department is responsible for evaluating and funding grant applications for educational activities for health care professionals. “I believe in being an active participant, not a bystander, and giving back to the community both professionally and personally. Actions always speak louder than words. It’s all about how you treat people, doing what you say and working toward positive change.” She is a fellow of the Alliance for Continuing Education in the Health Professions, past president at BridgeEdU in Baltimore, Md., and an active participant, not a bystander, and giving back to the community both professionally and personally.

Lynn Hawkins ‘77 says she learned to stand up for herself at Wofford. “I learned to say what I thought, even if it wasn’t the most popular viewpoint. I learned that my viewpoint was often different, but no less important. Wofford made a woman out of a girl. That woman grew up to be me, and I am still standing up and speaking out for others.” After graduation, Hawkins worked in child protective services investigating child abuse and neglect. She says she saw things that still haunt her today. She is now the executive director of Safe Homes-Rape Crisis Coalition in Spartanburg. For 26 years, she has been a voice for women who are too afraid to speak.

Dr. Norma Lynn Fant Higgins ’81 was recently on campus celebrating the Commencement of her son, Fess Higgins. Class of 2015. After graduation from Wofford, she earned a master’s degree in social work. She has worked in Washington, D.C., for Kaiser Permanente and the Psychiatric Institute of America, gaining experience in working with young women with eating disorders. When she moved back to Charleston, S.C., she opened a private practice. Currently she works for the Medical University of South Carolina with the Centers for Disease Control and Prevention and the Department of Health and Environmental Control to expand testing for HIV in hospital emergency rooms and for the Ryan White Program in the Department of Infectious Diseases. She continues to work in private practice seeing college and high school students with eating disorders as well as adults with mental health concerns. Higgins says her favorite memories of Wofford involve a whipped cream fight with her roommate and her work as the student assistant for Dr. Lewis P. Jones ’38. “He told me to answer the phone in his office. When he left, and the phone started ringing, it was not in its usual place in the bottom of the file cabinet, but outside on the window ledge in the snow!”

Dr. Debora Johnson-Ross ‘81 and Joyce Payne Yette ’80 were members of the South Carolina State Student Legislature in 1979-80. Dr. Debora Johnson-Ross ‘81 (then in her senior portrait) and now as a senior vice president at BridgeEdU in Baltimore, Md.)

Dr. Debora Johnson-Ross ‘81 and Joyce Payne Yette ’80 were members of the South Carolina State Student Legislature in 1979-80.
leader of the industry member section and currently is serving on committees for advocacy and membership. She’s been recognized over the years for contributions to the field and this year became an emeritus board member for the Allergy & Asthma Network, having served 17 years on its board of directors, including a term as chair. She also was a member of the National Task Force on CME Provider/Industry Collaboration from 1998 to 2012. After graduation from Wofford, Mason worked in pulmonary and allergy research labs at Johns Hopkins while in graduate school. From there she built a career in medical affairs and education and has become an expert in the field, directing and speaking at national conferences. She and her husband, Scott Swanson, recently celebrated their 35th wedding anniversary. They have three sons and four grandchildren. “My years at Wofford helped shape who I am today. I learned a lot about myself—how to communicate, how to interact with others who may have very different opinions and how to focus on positive change. I felt challenged, both positively and negatively. It was difficult for me to understand why anyone would object to having women as students at Wofford. The other women and I started a group called the Association for Wofford Women to promote the interests of female students and address the issues that affected their lives on campus.” She still feels the influence of Dr. James Seegers, Dr. Don Scott, Dr. John Pilley, Dr. Scot Morrow and Constance Armitage Antonsen. “And then there was Dr. John Harrington who was different than anyone I had ever met before. Despite not doing very well in his classes my first year, Dr. Harrington became my mentor was Dr. John Harrington who was different than anyone I had ever met before. Despite not doing very well in his classes my first year, Dr. Harrington became my mentor and friend for the next three years. Two things he said to me that I have never forgotten and have guided me through life and as I have mentioned others. The first was at graduation when he apologized to me for not recognizing my abilities as a freshman. The second was a few years later when I stopped by to say hello and share what I was doing. He looked at me and said, ‘Pam, cream always rises to the top. I am very proud of you.’ He was the ultimate mentor. Wofford, the professors and my fellow students helped me find my voice and my confidence. That has served me well in life.”

Dr. Rita Meeks ’78, a transfer from Iowa State, remembers playing the mother in the Wolford Theatre Workshop’s production of “Three Penny Opera” and getting straight A’s in calculus (she missed only one question all year). She retired as an obstetrician/gynecologist in 2003, and now she spends her time with her family, playing golf, writing songs and playing the flute. Meeks has a new album: “The New Creed of Na” (thenewcreedbyrma.com).

After graduating from Wofford, JoAnn Miller ’78 moved to Richmond, Va., and joined the investment brokerage firm of Wheat, First Securities, where she remained for 10 years before moving back to Spartanburg. After 30 years in the Investment industry, she retired as an investment adviser from Wachovia Securities. “In 1975 I was attending a small college in North Carolina. During a visit home to see my family, I stopped at Wofford just to get some information. It was my great, good fortune to meet Charlie Gray ’72 on that fateful day. He invited me in, asked me questions and just talked to me. I didn’t think too much about it. A few weeks later I received a letter from Wofford offering me a full academic scholarship to join the first co-ed group in the fall of 1975. Brilliant professors, friends, adventures and Wofford staff changed my life forever, and I am eternally grateful.”

Cheryl Martin Shell ’77, an assistant principal at Stonewall Jackson High School in Manassas, Va., is planning for retirement in 2017. She’s lived all over the country with her husband, who is in the military, and their son, Robert Jr. Shell remembers Wofford being “very academically challenging, but it was small enough for students to get to know professors well and to form lasting relationships with peers and support staff.”

Dr. Aline Buddin Teague ’81 practiced as a partner with Charlotte Obstetrics and Gynecology before teaching medical assistant students at King’s College. She enjoys combining her background in medicine with her love of teaching. Teague also stays busy with three children: Matt (21), Chris (19) and Laura (17). Her favorite memories of Wofford involve performing with the Wolford Singers in a vocal ensemble that toured the Southeastern states and Mexico with the Wolford Glee Club under the direction of Dr. Vic Bilanchone. “The music program united students from all aspects of campus who shared a love of singing and performing, and I made many lifelong friends with whom I still keep in touch!”

Judith Klasen Tolbert ’77 was not a traditional student when she attended Wofford. She already had bachelor’s and master’s degrees in music from Converse and was a piano and organ teacher and organist at St. John’s Lutheran Church. She was teaching music at Presbyterian College and working as a church musician when she married Tom Tolbert. 67. They have one daughter. Tolbert eventually became a CPA but continued to serve as a church musician. Tolbert says she will never forget her first biology lab at Wofford, something that taught her to have confidence and ask for help. Tolbert’s family donated the works of South Carolina artist Julia Elizabeth Tolbert to Wofford, and they contributed funds for the renovation of the Montgomery Music Building (a practice room is named in their honor). “My experiences at and related to Wofford have vastly affected my life in ways I could never have imagined.”

Suzanne Gray Willie ’81 loves living on the water in Beaufort, S.C., with her husband, Billy, who is a local artist. She is a partner and controller of Gray RE Holdings and Venture Inc. Willie says that when she’s not working, she’s usually on the tennis courts. She has a son, country with her husband, who is in the military, and their son, Robert Jr. Shell remembers Wofford being “very academically challenging, but it was small enough for students to get to know their professors well and to form lasting relationships with peers and support staff.”

Dr. Aline Buddin Teague ’81 practiced as a partner with Charlotte Obstetrics and Gynecology before teaching medical assistant students at King’s College. “When no one (including Spartanburg Fire and Rescue) could control the flying food, Dean [Frank] Logan stepped into the middle of total chaos: ‘What in the hell is going on?!?!’ Order was immediately restored, followed by T-bone steaks with trimmings served at our next evening meal!”

“Tables turned on their side for fortifications, spaghetti spattering against the floor-to-ceiling windows and sliding down, cops, fire trucks, the mob’s parade down Main Street to Converse, where that oldest of traditions, a panty raid, ensued… the overreaching local constabulary sicced the dogs on us, and we called it a day. A good way to cap our years at dear ol’ WC.”

More than any other memory, it seems, the Wofford Class of 1965 remembers the food riot best. They shared food fight stories and other tales of their Wofford experience in a booklet published for their 50-year reunion.

Each year Wofford holds the 50th class reunion during Commencement weekend. The class joins the 50-Year Club at Homecoming, but their special reunion weekend in the spring includes leading the newest class of graduates during graduation, a reunion dinner and lots of catching up with old friends. This year 47 members of the class were present for the reunion (including Billy Rivers and Jerry Park, whose memories of the food riot lead this article).

Many alumni point to Dean Frank Logan as a mentor during their college careers. The Rev. Doug Bowling, who carried the Class of 1965 banner during Commencement, for example, tells how he met with Logan shortly after being accepted as a transfer student in 1963:

“Frank Logan was a mentor to me and taught me what a real Wofford man should be. At graduation Wofford awarded my wife an honorary degree—PH.T. (Pushing Hubby Through)… This was from the heart and was well deserved.”

Todd Heldreth writes that he owes his wife, Carolyn, and Logan both for his degree: “Dean Frank Logan was a mentor to me and taught me what a real Wofford man should be. At graduation Wofford awarded my wife an honorary degree—PHT… This was from the heart and was well deserved.”

James D. DeVine Jr. worked in textiles for 25 years before switching to work as a wellness specialist at 47. He now works part time for the Ann Spring Close Sports Complex in Fort Mill, S.C., where he is heavily involved in his community.

Dominic Alfred “Mickey” Caggiano Sr. was also unable to attend, but reports that since graduating from Wofford he has been involved in, among other things, commercial development, including assisting on the design of the “Peachoid” water tank and Premium Outlets “The Yellow Mall” in Gaffney. Rob Moreland also missed the reunion, but he may have been unable because of his work as a national disaster response volunteer with the Red Cross. He has completed 26 deployments, including New York City during 9/11 and New Orleans following Hurricane Katrina.

FROM MEMORIES OF WOFFORD TO WHAT THEY'RE DOING NOW

by Sarah Madden ’17

FACTS ABOUT THE CLASS OF 1965

BY DR. PHILLIP STONE ’94, ARCHIVIST

The Class of 1965 came to Wofford in September 1961 with 249 members. They came to a newly reconstructed MAIN BUILDING and a new MILLIKEN SCIENCE HALL.

While they were students SHIPP AND DUPRE HALLS opened, and the student body first grew beyond 1,000 STUDENTS.

At the start of their senior year, Wofford became the FIRST PRIVATE COLLEGE in South Carolina to DESEGREGATE, making the Class of 1965 the first class to graduate from an INTEGRATED WOFFORD COLLEGE.

The business office was still running the PLEASURE FUND—created by a member of the Class of 1939—and the Old Gold and Black student newspaper noted that on afternoons before a fraternity weekend or dance, the BUSINESS OFFICE looked like a loan office!

For HOMECOMING the bands included THE VIBRATIONS, DR. FEELGOOD AND THE INTERNS and MAURICE WILLIAMS AND THE ZODIACS.

“Wofford was certainly not a ‘give me’ education, in that you had to work for what you got—a good lesson for life. It has never let me down.”

Ken Davis

“Frank Logan was especially helpful. I returned to Wofford after 25 years, walked into his office on campus, and without introducing myself, he greeted me by name. THAT IS WOFFORD.”

Arthur J. Slayton Jr.

Take one course at a time or enroll in six- or nine-course programs. Try your hand at birding, bridge, the acoustic guitar, the world of Sherlock Holmes, the music and culture of the 1960s, local history, photography and more. 1992 Nikki Palmieri Chunn, class chair
Kellie Crook Kanipe is a CPA and manager of the assurance and tax departments at Crowe.

Silverman Teaching and Writing in Japan
Alex Silverman ’14 teaches English through the JET Program at an international high school in Tokyo. His classes range from basic communication to thesis writing and debate. “It is the hardest and the best thing I have ever done,” says Silverman. “Now Japan feels like home, and I cannot imagine leaving anytime soon.” When he’s not teaching or traveling, Silverman writes for JapanTravel, and he recently finished an internship writing for Phi Beta Kappa’s The Key Reporter.

“Living and working in Japan has profoundly improved how I view the world and how I view myself. I am living my dream,” says Silverman. “I always will be thankful to Wofford for giving me the courage to grow. The list of people who inspired me at Wofford is long, but sincere. Thank you to Dean Daley Coburn, Tim Brown, Dr. Dana Tralka, Dr. Byron McCane, Professor Mike Curtis, Dr. Ricky Madden, Dr. A.K. Anderson, Dr. Tracy Revels and Dr. Anne Rodrick for expanding my mind... to Dr. G.R. Davis, Dr. John Moeller, Dr. Kirsten Kirks-Aigner and Dr. Boasa Brunow for expanding my world... and to the Wofford community— from Miss Cathy at Player’s Corner to the outstanding reference librarians to my friends who became my family—for expanding my heart. To Dr. David Ehruf especially, whose teaching sparked my interest in Japan and whose unwavering support got me here. I am forever grateful for what you have done for me.”

A "FOOL" AND HIS MONEY

Jason Moser shares investment secrets with his daughters—and the rest of the world

by Jo Ann Mitchell Brasington ’93

Hannah Moser (age 10) and Ansley Moser (age 8) put their tooth fairy and birthday money to work. They invest in Starbucks, Under Armour and Apple, as well as four other companies, but then what do you expect from the daughters of Jason Moser ’93, an analyst for The Motley Fool?

In typical Fool fashion (which means that it’s easy for the average person to understand), Moser shares investment tips, and sometimes parenting advice—especially when it comes to money.

Moser says he started talking with his daughters about the stock market over lunch at Panera Bread Co.

“At the time I owned shares in Panera, so I just said, ‘Hey, we own a little bit of this business,’” says Moser. “Now they definitely appreciate the fact that when they put their money in work for the U.S. Department of State in Cairo and Kazakhstan. In Kazakhstan, you come in and do…. Every day is a new challenge and a new opportunity. It’s never mundane and never boring.”

After graduating from Wofford with a B.A. in economics, Moser went to work as a PGA professional at golf courses in South Carolina and Maryland. He met and married his wife, Christy, a software tester, before joining his dad in work for the U.S. Department of State in Care and Kazakhstan. In Kazakhstan, he discovered The Motley Fool, but after returning to the U.S., Moser worked with Travelers Insurance before landing his job with The Fool.

“The reason I know how to invest is because my dad taught me,” says Moser. “Whether it’s golf for investing or whatever, that’s the most valuable lesson I learned, even if it’s just getting started as soon as you graduate. Make sure you’re investing in your company’s 401K-plan if nothing else,” says Moser. “You can’t start soon enough.”

To read Moser’s blog or connect with him via social media, visit my.fool.com/

2004

Fryd Byers, class chair

John W. Hackney and his wife, Tara, announce the birth of their daughter, Elizabeth Quinlin Hackney, born May 11, 2015. She joins big sister Reese. The family lives in Charleston, N.C.

2005

Rajan Pasricha, class chair

Emma Litzenburg Ball and Thad Ball welcomed Jasper Brownlee Ball on April 1, 2015. The family lives in North Charleston, S.C.

Living in Charlotte, N.C., John Newton is director of business development for Esparro Finance.

Callison Tighe & Robinson attorney

Janet Rhodes was named a Super Lawyers Rising Star in the practice area of employment and labor law. The firm is located in Columbia, S.C.

2006

In April, Lacey Hilliard Dellingler joined the staff of MeadWestvaco as a sales development executive. She lives in Charlotte, N.C., with her husband, Matthew.

Living in Conroe, Texas, with her husband, Matt, Brittany Fieldgrove is a sales representative with CB&I in The Woodlands. They were married this past August.

2008

Nathan Magdian, class chair

Leah Gaylor Fitch and Austin Fitch ’09 announce the birth of Marla Fitch, born Dec. 21, 2014. They live in Charlotte, N.C.

Amber Evans Ludeman is the CEO of Montessori House and her husband, Russell Staley-Ludeman, live in Atkins, Okla.

2009

Payton Huy, class chair

Both employed by the U.S. Senate, Paige Hallen and Allen Hanson were married on Oct. 25, 2014. They live in Arlington, Va.

Dr. Ashley Carr Sims and Dr. Cole Sims announce the birth of Cambridge McCoy Sims, born Feb. 23, 2015. The family lives in Chapel Hill, N.C.

2010

Kaitlin Hill, class chair

Will Higa and Gina Vancouver Sprong were married May 2, 2015. Will holds a master’s degree in accounting and is employed with PricewaterhouseCoopers in Spartanburg. Candice has a master’s degree in health administration. They live in Greenville, S.C.

Kate Hendricks and Othaniel Laffitte were married May 29, 2015. They live in Greenville, S.C., where Othaniel is a relationship manager at First Citizens Bank. Kate is a law clerk in the firm. Helen Elizabeth Burris of the U.S. Bankruptcy Court in Spartanburg.

A reunion assistant for Convorse College, Kelsey Leahy lives in Spartanburg.

2011

Nam Pham, class chair

Paige Forrester and Grant Smith were married on May 2, 2015. They live in Pauline, S.C. Completing her medical residency in pediatrics at George Washington University in Washington, D.C., Dr. Amna Ahmed Hussain lives in Arlington, Va., with her husband, Zain.

Jessica Lee and Christopher Dunkerley were married April 11, 2015. Lee is a contact center team manager for Blackbaud Inc. She and her husband live in Charlotte, S.C.

2012

Halle Wilhite, class chair

Rob Gorrell has been hired by Colloton Preparatory Academy in Walterboro, S.C., and will become the head basketball coach. Gorrell has been a member of the Barnwell High School football and basketball coaching staff as well as a math teacher for the past three years.

Lizzy Lombard, a May graduate of Mercer University’s Walter F. George School of Law, recently had her article, “The Internal Revenue Service and Bitcoin: A Taxing Relationship,” accepted for publication in the Virginia Tax Review. The article discusses the IRS’s approach to the valuation of bitcoins and the problems that arise from this new asset class, and considers the role of the IRS as a student-writing editor for the Mercer Law Review and an editor for the Journal of Student-Centered Learning. Lombard is enrolled at the University of Florida Levin College of Law in the tax program.

2014

Sarah Carter lives in New York, N.Y., and is an analyst with Barclays. Living in Charleston, James Detter is working as the executive director of U.S. Rehab and Nursing Center, a subsidiary of The Rehabilitation Institute of Chicago.

James Lawson has been named minister to students at Seconae Baptist Church in Spartanburg. He plans to begin seminary this summer.

THREE GRADUATES RETURN TO SHARE INSIGHTS

Clinical Psychology 420 uses practicing clinicians to train future professionals by Jo Ann Mitchell Brasington ’93

Dr. John LeBlanc, chairman of the Department of Psychology, expects his Clinical Psychology 420 students to struggle in this class—but he doesn’t expect them to struggle alone.

Three professors—Stefanie Carrigan, Dr. Erica Cosho ’07 and Paige Forrester Smith, all practicing therapists in the Spartanburg community—told their returning to campus this spring, presenting real-life scenarios, talking to the class about careers in the field, and serving as sounding boards and advisors for the students.

“This class helped set me up for success in graduate school. I was constantly referring back to the notes,” says Cosho, who works as the Spartanburg County School District 1 school-based supervisor through Spartanburg Area Mental Health (SAMH). She also does contract therapy at the Children’s Advocacy Center. “I was honored to be asked to return.”

Cosho majored in psychology and sociology at Wofford and earned her master’s degree at the University of South Carolina. “Even if students in the class are not going to become practicing therapists, everyone in health care is going to deal with people with mental issues,” she says. “This class helps the students realize that their own experiences, biases and issues affect their diagnosis and response to the patient. By learning this, students are less likely to make these mistakes.”

Cosho, who earned a master’s degree in marriage and family therapy from Converse College and went on to earn her state license in the field, works with SAMH. As the Department of Social Services (DSS) liaison, she assesses clients and does therapy with clients of both organizations. “This was my favorite class at Wofford,” says Smith, who majored in psychology and minored in religion. “I was prepared for graduate school, but more importantly it has prepared me for the challenges of the workplace.”

Smith says that she takes time out of her day to help with the class because she wants to prepare Wofford students for the different people who will walk through the door. “Spartanburg Area Mental Health is happy to give us the time to help with Dr. LeBlanc’s class because they want us involved in the community. Also, someone in the class could be the next mental health professional,” she says.

LeBlanc, who designed the class, expects students to finish the course with the ability to think and write like a clinician.

“Other classes often teach this type of course as a how-to, we use a problem-based approach,” he says. “Students study textbook theories then apply them to real-world scenarios. Because they are based on actual situations, students can empathize with the clients. The students have to come up with a diagnosis, but they’re not over-thinking. They struggle mightily with this, and many learn that the skills they think they’re working on are not really what they’re learning.”

Carrigan, a psychology major at Wofford who went on to earn a master’s degree in marriage and family therapy at Converse, says the class was beneficial to her for that very reason.

“Cases are not all black and white,” says Carrigan, the Spartanburg County School District 2 school counselor and therapist with SAMH. “This class helped me for the times I don’t know a definite diagnosis but have to find a way to help anyway.”

Carrigan and Cosho now feel they’ve come full circle, and they all believe that teaching this class is an important way to help their students develop as empathetic therapists.

“Dr. LeBlanc sends us the students’ papers,” says Carrigan, “These students are smart, and they have our eyes and insights. Sometimes they point out something that clicks and that I can use to help a patient.”

According to Carrigan, LeBlanc, Cosho and Smith are in good company. Dr. James E. Seegar, professor emeritus of psychology, was the first forerunner to present cases to the class. Other local mental health practitioners have followed suit.

“We have a wealth of experience and knowledge for sharing that experience right here in Spartanburg,” says LeBlanc. “Students get a head start—and good do well, and we appreciate them returning to share with current students.”

Three graduates return to share insights.
IN MEMORIAM

1941
George Edwin Tate Sr., April 10, 2015, Greenville, S.C. Tate served in the U.S. Army during World War II. He was commander of the USAF School and founded Tate Furniture. During his furniture career, Tate was named Business Man of the Year by the Greenville Business Men’s Club and was a charter member of the Spartanburg Rotary Club. He was a partner in the family’s furniture business for 31 years.

1951

1952
James “Jimmy” “Stick” Rufus Gordon, April 2, 2015, Spartanburg, S.C. Gordon attended Wofford on a basketball scholarship. He spent two years in counterintelligence with the U.S. Army before enjoining a long career with New York Life Insurance. He was a leader of Wofford alumni events and was a major supporter of education, establishing an endowed scholarship at Wofford.

1953
Donald James Petersen, May 8, 2015, Columbia, S.C. Petersen served as a medic in the U.S. Marines during World War II. He worked as a pharmaceutical sales representative for 37 years before becoming a counselor for the South Carolina Vocational Rehabilitation Department.

1955
George “Jerry” Lester, April 22, 2015, Salina, Kan. Lester served in the U.S. Army from 1951 to 1953 before beginning his career with First Federal Savings and Loan in Spartanburg. He served with the Federal Home Loan and Savings and Loan.

1957
Dr. Robert Evans Holman, February 18, 2015, Spartanburg, S.C. Holman attended Wofford on a basketball scholarship. He spent two years in counterintelligence with the U.S. Army before enjoining a long career with New York Life Insurance. He was a leader of Wofford alumni events and was a major supporter of education, establishing an endowed scholarship at Wofford.

1958
Dr. Orville Stanley Smith Jr., April 22, 2015, Salina, Kan. Smith was a former Wofford trustee. In 2006 he established an endowed scholarship at Wofford. He was a former Wofford trustee Neel Hipp. She was an avid supporter of education, establishing an endowed scholarship at Wofford.

1959
Alvis Jesse Bynum, April 19, 2015, Spartanburg, S.C. Bynum was a founding member of the Wofford tennis team and a member of the Alpha Kappa Order.

Michael Allgood Johnson, April 20, 2015, Greenville, S.C. Johnson was hired as the tennis director for the South Carolina Vocational Rehabilitation Department.

Michael Algood Johnson, April 20, 2015, Greenville, S.C. Johnson is the son of the late Dr. Orville Stanley Smith Jr. He was a former Wofford trustee Neel Hipp. She was an avid supporter of education, establishing an endowed scholarship at Wofford.

Friends
Blanche “Bunny” Yvonne Bellamy Gordon, March 21, 2015, Spartanburg, S.C. Gordon was the first woman to serve as president of the Spartanburg Women’s Club. She was a proud supporter of the arts and a statesman and was named Woman of the Year by the Spartanburg Woman’s Club.

LeRoy Edward Dennis Jr., April 30, 2015, Spartanburg, S.C. Dennis was a counselor for the South Carolina Vocational Rehabilitation Department.

Vernon Freeman “Rose” Tate Jr., April 26, 2015, Spartanburg, S.C. He worked for Adidas for years and served as an officer in the United Methodist Church.

Making Memorial Gifts
Three ways to make a memorial gift
1) Call the Office of Development at 864-597-4200
2) Visit www.wofford.edu/supportwofford
3) Mail a check made payable to Wofford College to: Office of Development 429 Millwood Spartanburg, S.C. 29303-3636

FROM THE ARCHIVES

The women before there were women by Philip Stone ’94

After a vote by the Board of Trustees in October 1945, Wofford College admitted its first women students in the fall of 1946. Sometimes the first is the last. However, in the case of Wofford, the opposite was true. This is the story of Wofford women that started the story of Wofford women.

Remember to include the name of the person you are honoring with your gift to the college.
TALKING WOFFORD AND CROP ROTATION
Gathering tobacco on my dad’s farm during the summers when I was growing up taught me a lot, like the value of sunscreen and of keeping a hoe within reach to fend off water moccasins. It also taught me the value of planning ahead for the next crop, even while harvesting the crop still in the field.

Likewise, Wofford’s Office of Admission continuously plans ahead for the next crop of students. One crop graduates. Another prepares to enroll, and year after year, crop after crop, outstanding students become outstanding graduates. Our Wofford degrees become stronger with each class. The work of the college’s Admission Office, however, does not happen by accident. They need alumni assistance to succeed in their work.

As a member of the Wofford College Alumni Association, you can help by identifying prospective students in your community and getting them to visit the campus. Describe the value of a Wofford education. Tell personal stories about your Wofford experiences. These help prospective students connect to the college on a personal level. Once on campus, the Office of Admission is adept at helping prospective students determine how Wofford fits into their future.

Invariably, questions such as “How can I afford Wofford?” and “How is Wofford different from other liberal arts colleges?” arise when talking to prospective students. Concise but effective answers to these questions soon will be available on the Alumni Association website. Your answers to these questions, along with your personal stories about Wofford, provide an effective combination for recruiting and allow you to help Wofford without spending a penny.

The Alumni Association recently began a new student recruitment initiative to help the Office of Admission organize alumni volunteers to serve in their local communities. These alumni volunteers will represent Wofford in a variety of roles, including hosting prospective students in their homes and attending similar events. Primarily, these alumni volunteers serve as friendly reference points for prospective students and their families. Please stay tuned for more information on this exciting new initiative.

Go Terriers!
Andy Beeson ’90
President, Wofford College Alumni Association

WELCOME CLASS OF 2015
Our ranks grew by 368 with the graduation of the Class of 2015 in May. On behalf of the Wofford College Alumni Association, we welcome our newest Wofford alumni to the fold and congratulate them on their achievement.

VICKIE MULLER ELECTED ALUMNI ASSOCIATION PRESIDENT FOR 2016
The alumni association recently elected Vickie R. Muller ’83 of Columbia, S.C., as president for 2016. Muller brings to the association substantial professional experience in higher education and volunteer experience leading the Black Alumni Summit’s highly successful campaign to raise money for the multi-cultural house and engages African-American alumni more fully in the life and work of the college. Her natural leadership skills make her a perfect fit to lead the Wofford College Alumni Association. We are fortunate that she is willing to serve.
